Fitness week for
Oracle database platform

On-premises and in the cloud

CHECK, OPTIMIZE, AND COMPARE YOUR ORACLE PLATFORM PERFORMANCE USING A STANDARD PROCEDURE.

The peakmarks® software is designed to identify the crucial performance indicators of your Oracle platform. It offers over 30 micro-assessments across 8 workload groups, providing a complete and representative overview of your database service's performance in all load situations.

Endurance
Check the performance of the components and important Oracle background processes and maintain the balance under various load conditions. The performance limits are evaluated and compared against your requirements, allowing you to identify any discrepancies.

Power
The optimum ratio between the required performance and the actual investment costs is based on selecting suitable platform components and configurations, both on-premises and in the cloud.

Speed
Maximize the performance of your Oracle platform by efficiently completing assigned tasks.

Certified services
The Assessment Week provides all the key figures and a comparison with the latest Oracle technology.

FITNESS WEEK FOR YOUR ORACLE PLATFORMS

We measure your existing platform, and you receive

– All important key figures of your Oracle platform
– Management presentation
– Comparison with the latest Oracle platform

Our offer

During the fitness week, we will work with your team on the following activities:

Day 1

We need to have a kick-off meeting to define the procedure for performance measurement, discuss different scenarios, and choose the platforms that will be used.

2nd - 3rd day

Measurement of an Oracle platform and documentation of the results.

4th day

Reserve day

5th day

Final presentation

Details

We are pleased to offer you our Oracle platform fitness week at a discounted price of CHF 16,870 (excluding VAT). This offer includes all services and license fees and is valid until August 31, 2024.

The measurement of your existing Oracle platform and the comparison with the latest Oracle platform are included.

* The measurement is carried out using software from Peakmarks.

The peakmarks® software is the most comprehensive software for measuring the performance of Oracle platforms. It uses the latest Oracle features and is optimized for the respective Oracle version. No additional hardware, software, or scripting is required. After a short introduction, the software is easy to install and can be operated by your database administrators.

As different as our customers' requirements and Oracle databases are, Tradeware is at their side at every level. We support our customers in reducing the costs of their complex platforms, modernizing and optimizing their technology, increasing systems availability, and simplifying maintainability — in the long term and sustainably.

«PERSONAL, SYMPATHETIC, STRONG»

Oracle platforms

Oracle platforms on-premises or in the cloud. We are there for you throughout the entire evaluation and implementation process.

Managed Services

Managed services for Oracle database infrastructure. Our wide range of services provides support in many areas.
